FINANCIAL STATISTICS
CANADIAN MUNICIPAL GOVERNMENTS

THIRTY-SIXTH YEAR OF PUBLICATION - 1955 ISSUE

FOREWORD

The Institute presents herewith the Thirty-sixth Issue of *Financial Statistics — Canadian Municipal Governments*. The aim has been to provide figures that are comparable with those given in previous issues of the "Red Book" and that permit comparison between individual municipalities.

The publication is issued in loose-leaf form and when completed will give statistics for all urban municipalities with a population over 600 with the exception of those in the Province of Quebec. Due to the difficulty in gathering some of the required information, complete coverage can only be provided for the larger cities in this Province. Other statistics on Quebec municipalities in the Institute's files will be given out on request. Statistics for counties in Ontario and the Maritimes as well as for some rural municipalities in Western Canada are also given.

Many of the statistics given in this publication have already gone out to subscribers in mimeographed form. This rush-release service has been developed to provide subscribers with statistics for the larger municipalities as the information is received and analyzed in advance of publication of the "Red Book." In addition, subscribers are invited to write to the office of the Institute for the latest information in the Institute files. Toronto subscribers may make inquiries by telephone by calling WALNUT 1-5444.

The layout of the material in the current issue follows the pattern which was introduced with last year's "Red Book." Within the population groupings — (1) over 10,000, (2) 2,000–10,000, (3) 600–2,000 — all suburban and semi-urban municipalities are listed with urban centres in the appropriate categories. For each category in turn, municipalities in the western provinces are reported first and then, proceeding eastward, the centres in other provinces are listed. A special page on Newfoundland municipalities is provided for all places except St. John's, which is included with the Maritime centres over 10,000 population. Data on rural and district municipalities, including Ontario counties, is presented in the final three pages.

Within this general framework, population growth during the past year has necessitated the shifting of a considerable number of urban and semi-urban municipalities to a higher population grouping. Subscribers will note in this connection that there has been a sufficient increase in the number of centres over 10,000 population to require two further changes. Manitoba municipalities over 10,000 population are now reported at the top of pages 4, 5 and 6 rather than at the bottom of pages 1, 2 and 3. And the large Quebec centres are now covered in two series of four-page reports rather than one. The indexing both by provinces and by municipalities has been revised accordingly.

The Institute wishes to express its appreciation of the excellent co-operation received from municipal treasurers and clerks, school treasurers and the provincial governmental departments concerned with municipal and school statistics in the supplying of these data. It also wishes to thank its subscribers for their continued support.

(*S*) Surplus. (*D*) Deficit.

(*a*) As standards used for urban municipalities do not apply, figures have not been put on a per capita basis.

(*b*) Excludes municipalities separate from the county (cities and separated towns).

(*c*) This property is liable for taxation by the township, village or town within whose limits it lies.

(*d*) Levied on the various municipalities within the county and not directly on individuals.

(*e*) As county rates need not be paid until December 20 (after which interest is charged), it frequently happens that a considerable amount of taxes unpaid at December 31 may be paid at a date early in the next year.

(*f*) As far as can be ascertained, none of these debts is for public utilities.
